## OEM NOISE CONTROL SERVICES

- NOISE SPECIFICATION BUY-OFF
- NOISE CONTROL EVALUATION
  - DESIGN ASSISTANCE
  - NOISE ABATEMENT
- TROUBLESHOOT CUSTOMER BUY-OFF ISSUES
- CUSTOMER SPECIFICATION IMPLEMENTATION EVALUATION

**PHASE TO** Inc.

## WHY SHOULD YOU USE PHASE TO, INC. FOR YOUR NOISE CONTROL NEEDS?

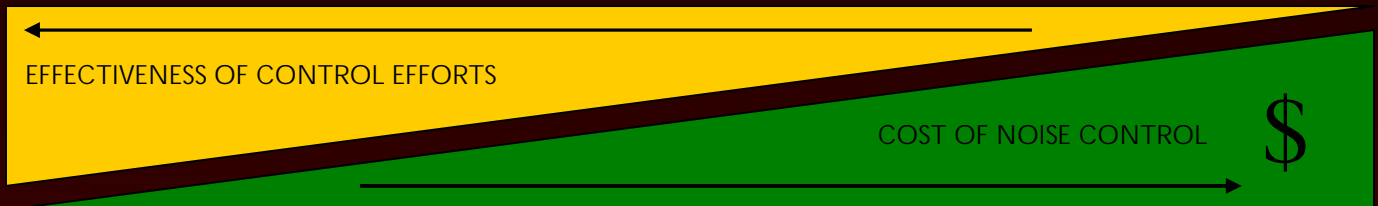

Why use Phase To, Inc.? Many companies feel that they can take care of noise measurement and abatement issues themselves. Finding out you have a compliance issue at buyoff time is not

just a minor set-back. Now it is costing you money ... far more than the cost to bring in the proper expertise at the proper time in the process. Don't waste valuable time and floor space waiting

for your equipment to be approved by your customer, or worse, a delayed payment, until corrective actions have been applied. Allow us to be your experts starting from specification application to

buy-off and we will help ensure that your customers are satisfied, and your equipment is delivered and paid for without unnecessary costly delays.

## EQUIPMENT BUILD TIMELINE

Addressing noise control early in the process saves money and ensures that controls are both integrated and effective.

PREPARE BID	DESIGN	BUILD	VALIDATE
<ul style="list-style-type: none"> <li>Estimate Cost of Controls</li> <li>Determine feasibility of meeting Customer Specification</li> </ul>	<ul style="list-style-type: none"> <li>Integrated Noise Controls</li> <li>Attenuation Prediction</li> </ul>	<ul style="list-style-type: none"> <li>Purchase Noise Control Devices</li> <li>Implement Controls</li> </ul>	<ul style="list-style-type: none"> <li>Evaluate controls</li> <li>Submit Certification</li> </ul>
<p><b><u>Can you confidently answer these questions from your management? ... your customers?</u></b></p>			
<p>How does the noise specification apply to my equipment?</p> <p>What control measures does the specification require of me? How do I certify the equipment?</p> <p>Is certification required at my facility? ... at customer facility?</p>	<p>Have I identified all the potential noise problems?</p> <p>What are the costs for the designed in controls?</p> <p>Will the proposed controls be effective? Will they be sufficient?</p>	<p>Are the noise control materials being installed as designed?</p> <p>Have changes made during the build process affected sound levels?</p> <p>Do the controls allow for the proper operation of the equipment?</p>	<p>Do I have the correct measurement equipment? Is it properly configured?</p> <p>Do I have staff capable of properly applying the noise specification?</p> <p>Are the certification forms being completed correct?</p>

Let the experts at PHASE TO, INC. provide you with the answers to all your noise control needs. We provide dedicated expert professionals that service your needs in a timely, efficient and cost effective manner. Please call us now and let us help enhance your company's position in this increasingly competitive marketplace.
